NON WOVEN PRODUCTS

EMBOSSING

HYGIENE

Giving you the advantage in converting machine cut stations.

Materials specialized to your application.

Industry leading precision manufacturing techniques.

Insert Anvils & Knives

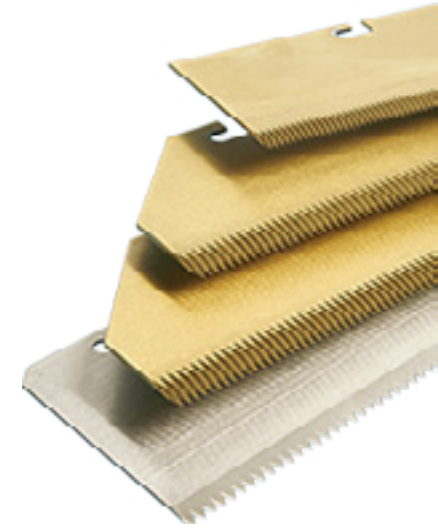

Advanced wear resistance and quality.

Eliminate build-up and tagging.

Bagger Blades

Stainless and high speed steels with a variety of coatings to reduce wear and build-up.

Holding Components

Even the best knives will not last long and cut accurately in worn out clamps and holders. Every detail of our components, from material selection to design features, will improve knife life and minimize costly stoppages. We can evaluate your current design and offer recommendations for improvement.

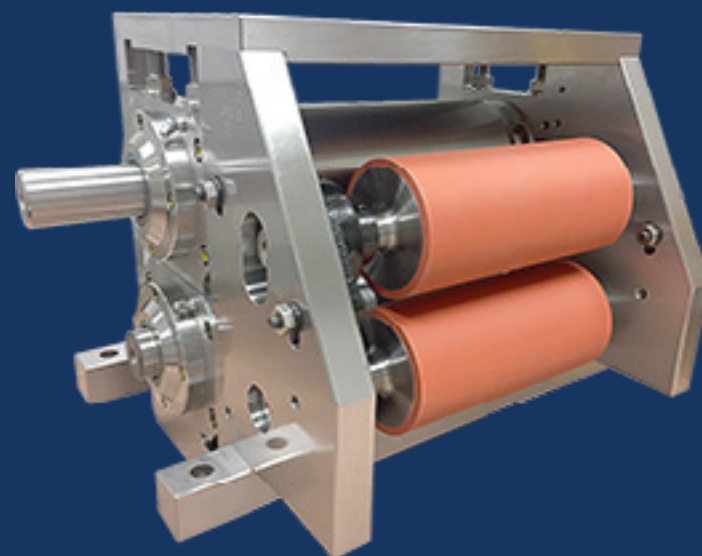

Knife and Anvil Rolls

- Designed by Everwear's engineering team to reduce maintenance downtime.
- Manufactured in-house to strict tolerances.
- Materials provide durability and corrosion resistance.
- Exacting tolerances in knife pockets ensure Everwear holding components provide perfect knife presentation for each cut.
- Precision ground bearing journals keep roll running true for years.

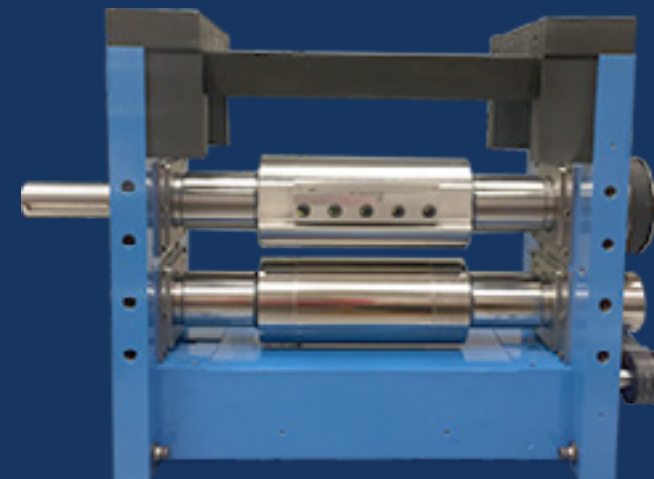

Cut Stations/Cut Modules

While precision knives can increase productivity on their own, they will never perform to their full potential without Precision Cutting Solutions applied to the entire cut module.

- Anvils designed to increase life of both anvil & knife.
- Holding components provide drop-in replacement & reduced time to flip & change knives.
- Knife & Anvil rolls manufactured with advanced materials & tight tolerances.

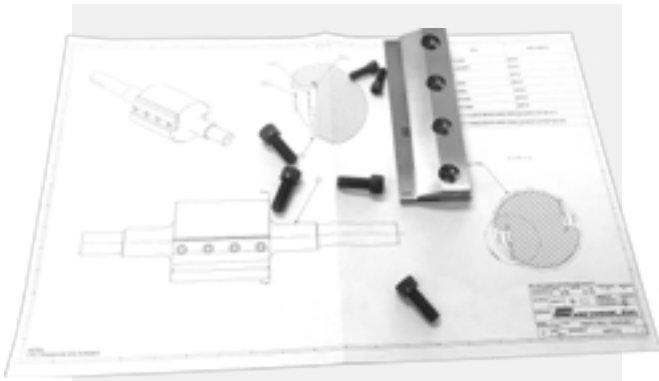

Rebuild/Redesign of Cut Modules

- Give your old module:
- New technology
 - Increased running speeds
 - Decreased maintenance time

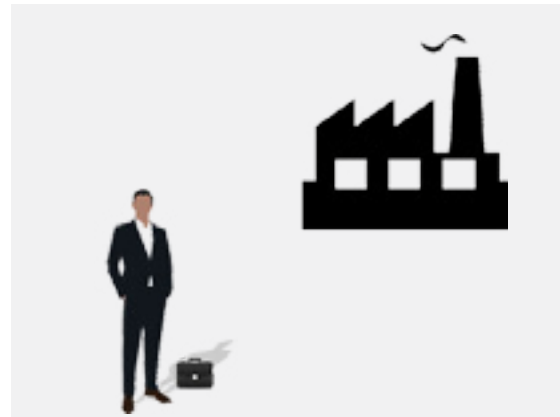

Patterned Sealing Rolls

Engineering/Design Services

Everwear's engineering team can be a valuable asset to your next job. Let the cutting experts at Everwear put our knowledge into your design to maximize overall investment and production.

Installation & Service

Our commitment to Precision Cutting Solutions goes well beyond our factory doors. We can advise about rolls, set-up knives, anvils and components for optimal performance at installation. We provide training for personnel of best practices for maintaining cut stations.

Our Foundation

Everwear was founded in 1983 with the principle of improving our customers' productivity using the latest in technology & materials. We used our strengths in the areas of material selection & metallurgical processes to become knife experts to our valuable partners in manufacturing. We believed from the beginning that when someone buys our product, they get much more than just a knife. They get years of experience and expertise from a partner who is committed to their success.

This is the foundation of Precision Cutting Solutions.
